San Francisco, CA 94111

Subject: Board of Pilot Commissioners' 2023 Waste Management Annual Report and Compliance with the Mandatory Commercial Recycling and the Mandatory Commercial Organics Recycling Laws

Allen Garfinkle:

The Department of Resources Recycling and Recovery (CalRecycle) received the Board of Pilot Commissioners' 2023 Waste Management Annual Report. This report is required to be submitted annually via our online State Agency Reporting Center (SARC) (Public Resources Code (PRC) Section 42962).

CalRecycle's Jurisdiction and Agency Compliance and Enforcement Branch (JACE) reviewed the report to determine if your agency is meeting the recycling requirements applicable to state agencies, including Mandatory Commercial Recycling (MCR) law and Mandatory Commercial Organics Recycling (MORe) law (PRC sections 42924.5(c), 42649.2, and 42649.81). MCR and MORe are two important laws in the state's overall effort to mitigate the ongoing global climate crisis and to move toward a circular economy in California.

After reviewing your agency's SARC report, JACE staff determined that the information provided by the Board of Pilot Commissioners indicates compliance with the requirements of the above referenced laws for 2023.

If the Board of Pilot Commissioners would like additional information on the annual report process or assistance with its solid waste and recycling programs, please reach out to your CalRecycle Local Assistance and Market Development Branch (LAMD) representative, Laura Chain at Laura.Chain@CalRecycle.ca.gov. Thank you for submitting your annual SARC report and your commitment to these important state goals.

Sincerely,

Ashlee M. Yee
Branch Chief
Jurisdiction and Agency Compliance and Enforcement Branch
